

XXXX

Computer Science Student / Software Engineer

📍 Beijing, China | ✉ sample.email@example.com | ☎ +1 234 567 890

🔗 GitHub: github.com/XXXX 🔗 LinkedIn: linkedin.com/in/XXXX | 📁 Portfolio: XXXXwebsite.com

Professional Summary

Motivated and detail-oriented Computer Science student with strong foundations in software development, algorithms, and system design. Experienced in developing academic and personal projects using Java, Python, C/C++, and web technologies. Passionate about problem-solving, embedded systems, databases, and full-stack application development. Seeking opportunities to contribute technical expertise and continuously grow in a professional engineering environment.

Education

Bachelor of Science in Computer Science

BUPT— Beijing, China

Expected Graduation: 06/2027

- GPA: 3.50 / 4.00
 - Relevant Coursework:
 - Data Structures & Algorithms
 - Database Systems
 - Operating Systems
 - Computer Networks
 - Embedded Systems
 - Software Engineering
 - Artificial Intelligence
 - Probability & Statistics
-

Technical Skills

Programming Languages

- Java
- Python
- C / C++
- JavaScript
- SQL
- HTML / CSS

Frameworks & Tools

- Git & GitHub
- MySQL / PostgreSQL
- Linux
- VS Code / IntelliJ IDEA
- Arduino / STM32
- MATLAB
- Docker

Areas of Knowledge

- Object-Oriented Programming (OOP)
 - Database Design
 - REST APIs
 - Embedded Systems
 - Data Structures & Algorithms
 - Networking Fundamentals
 - Software Testing & Debugging
-

Projects

Shapeville – Java Swing Educational Game

Java, Swing, OOP

- Developed an interactive desktop game for identifying 2D and 3D geometric shapes.
- Implemented drag-and-drop mechanics and real-time shape validation.

- Designed modular object-oriented architecture to improve maintainability and scalability.
- Enhanced user interaction with dynamic graphical interfaces and scoring systems.

Database Management System Design

MySQL, EER Modeling

- Designed and implemented a relational database system using MySQL Workbench.
- Created EER diagrams, normalized tables, and established entity relationships.
- Wrote complex SQL queries including joins, subqueries, and aggregation operations.
- Improved database consistency through normalization and constraint management.

Embedded Systems UART & LCD Project

C, STM32, UART Communication

- Built microcontroller-based applications involving UART serial communication and LCD display output.
- Implemented timer interrupts, GPIO control, and serial data transmission.
- Debugged embedded software using hardware testing and serial terminal tools.

Personal Portfolio Website

HTML, CSS, JavaScript

- Developed a responsive portfolio website to showcase projects and technical skills.
 - Designed modern UI layouts with mobile-friendly responsiveness.
 - Integrated project previews, GitHub repositories, and contact forms.
-

Experience

Software Engineering Intern

Baidu — Beijing, China
04/2025– 09/2025

- Assisted in developing and testing software modules for internal applications.
- Collaborated with team members using Git version control and Agile workflows.
- Participated in debugging, documentation, and feature optimization.
- Improved code quality through testing and peer review.

Achievements & Certifications

- AWS Certified Cloud Practitioner (Optional)
 - Oracle Java Certification (Optional)
 - LeetCode / Competitive Programming Achievements
 - Dean's List / Academic Scholarship
 - Hackathon Participation or Awards
-

Leadership & Activities

- Member of Computer Science Society
 - Participated in Hackathons and Coding Competitions
 - Open-Source Contributor on GitHub
 - Volunteer for Technical Workshops or Student Events
-

Languages

- English — Fluent
 - Chinese — Native
 - Other Languages — Optional
-

Additional Information

- Available for internship / full-time opportunities
- Strong teamwork and communication skills
- Interested in AI, embedded systems, software engineering, and backend development
