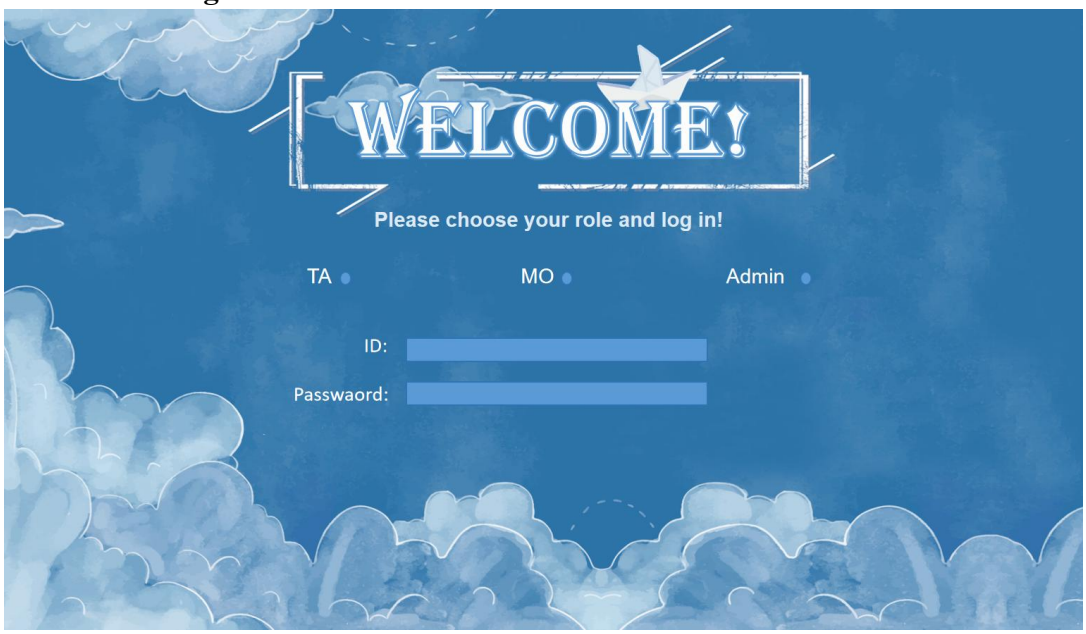
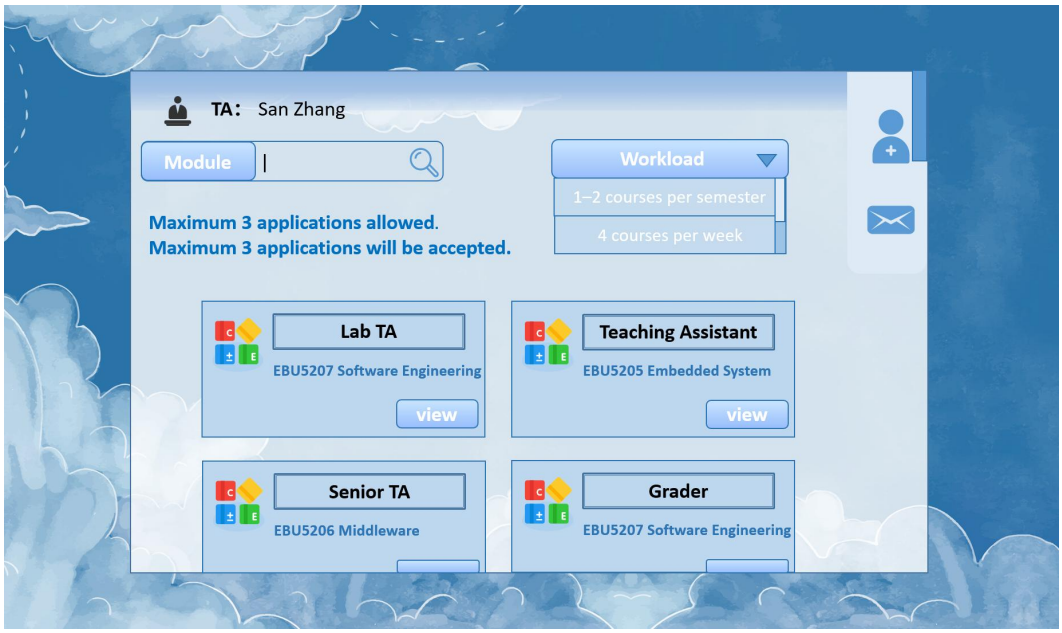
EBU6304 Software Engineering Group Project prototype

1. Welcome Page



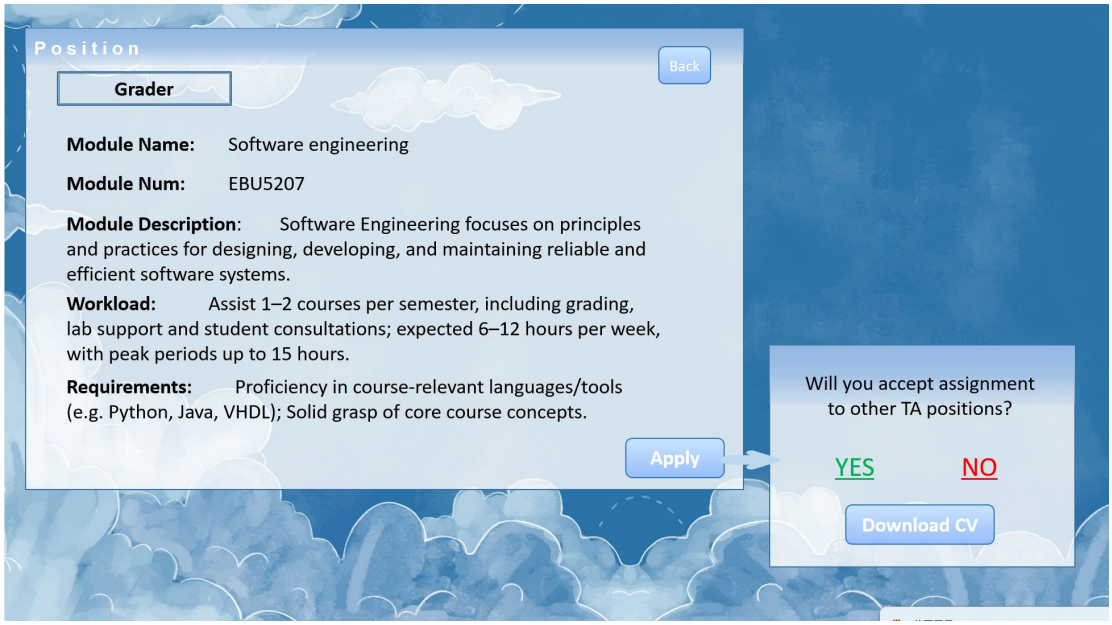
This is the welcome page. On this page, the user should first select their identity, then enter their ID and password for entering the correct interface.

2.TA Dashboard



After logging in with your TA identity, you will be directed to this page.On this page, you can search for recruitments by module and filter vacancies by workload.The page displays available positions, and you may click **VIEW** to view the detailed information about the position and submit an application.Click the avatar in the upper right corner to go to your profile page, and click the envelope icon to access your application history.

3.Detailed information about the TA position

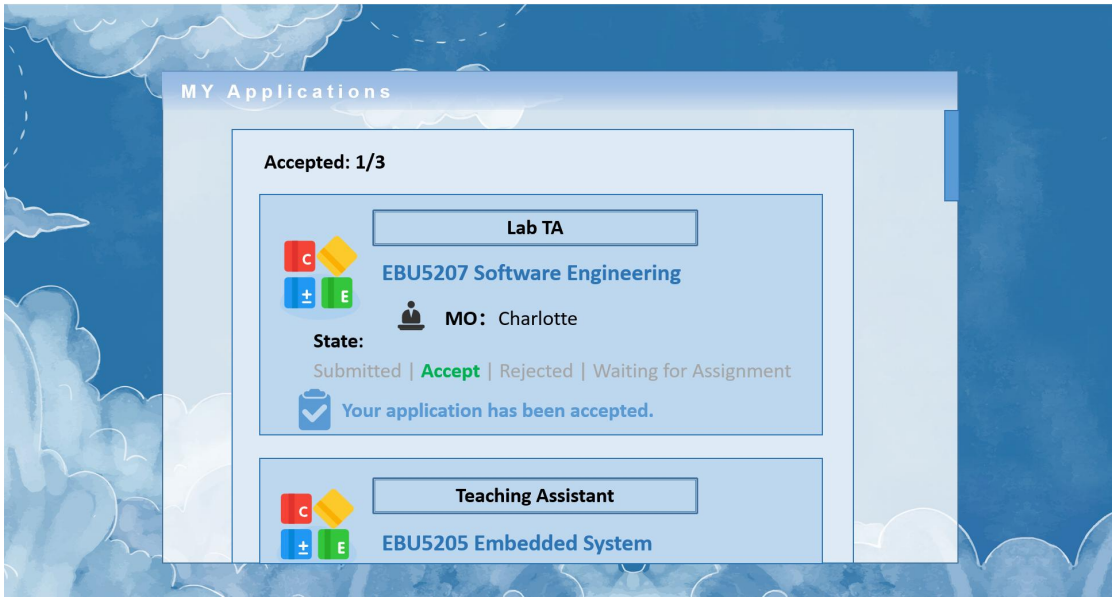


When a TA clicks **Apply** for a position, they will be redirected to this page. This page displays detailed information about the position, including the module name, num, description,workload and requirements. The TA clicks Apply again to confirm the application, after which a pop-up window appears asking whether the TA accepts job allocation adjustment. Accepting adjustment means the TA may be assigned to positions with no applicants. The TA can then click Download CV to upload their CV in PDF format for review by the corresponding MO of the position. Click Back to return to the TA dashboard page.

4.TA Profile

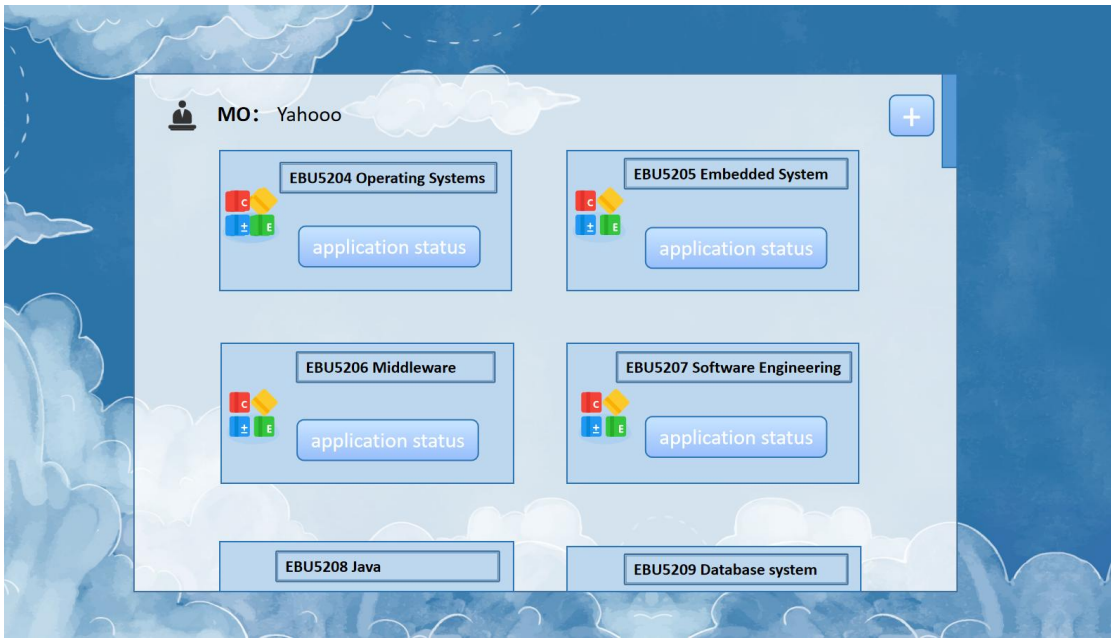
On the profile page, TAs can edit their personal information, such as their name(*),ID(*),telephone number(*),email(*) and skills. After clicking Publish, their profile will be viewable by the MO and admins. Click Back to return to the TA dashboard page.

5.Application History & Application Status



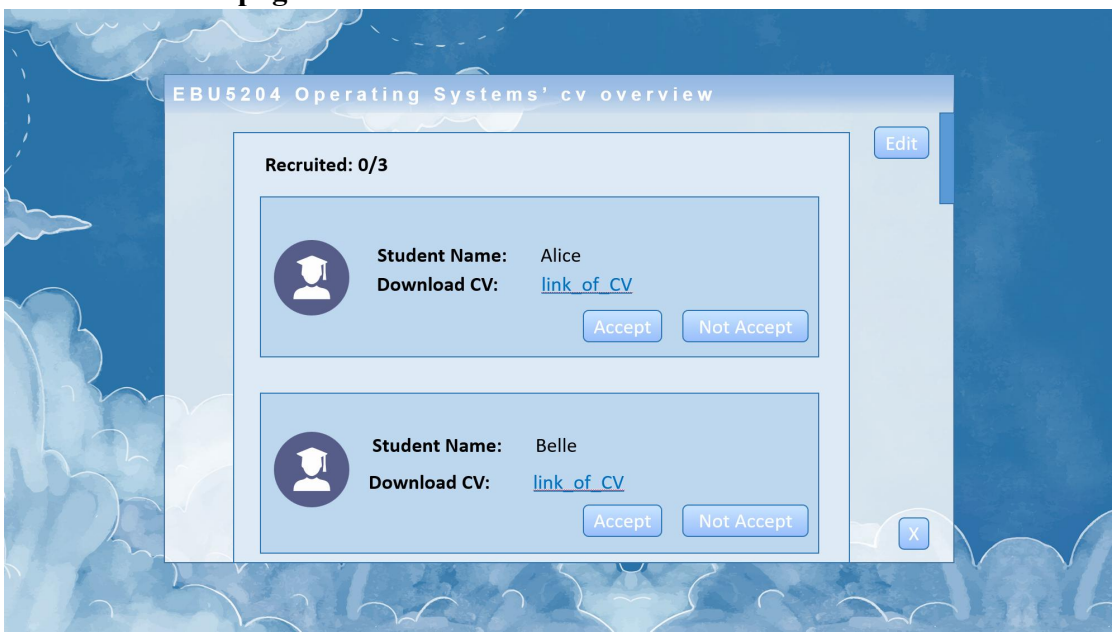
On this page, you can view your submitted applications and their respective statuses, along with the corresponding modules and MOs of each position. TAs may check the application status, including Submitted, Accepted, Rejected, and Waiting for Assignment. The number of accepted applications is also displayed here.

6.Module Dashboard page



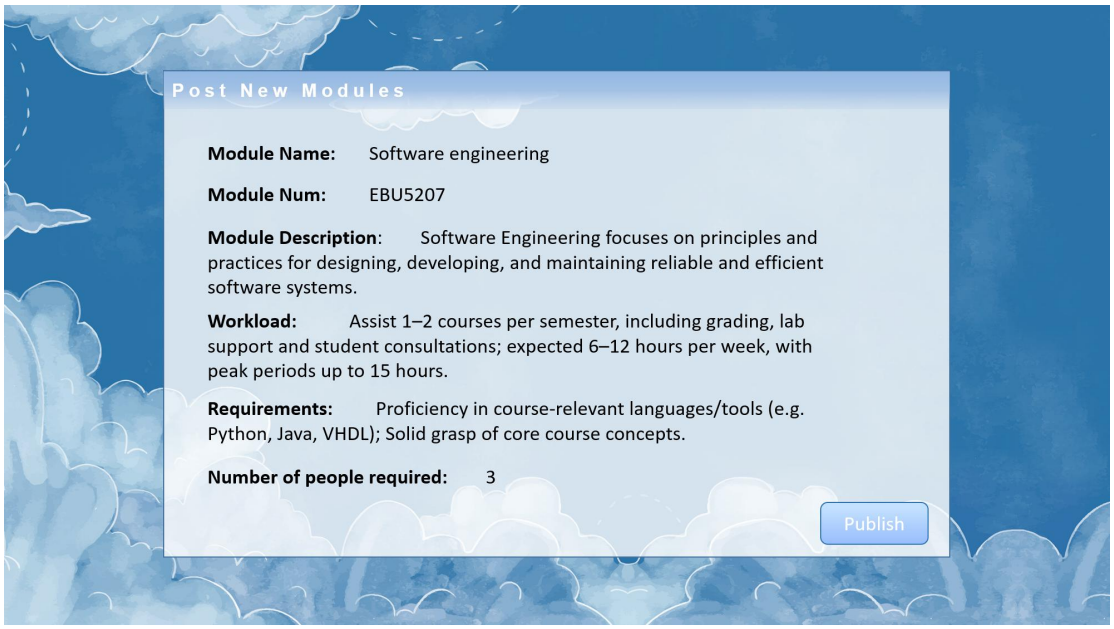
This is the Module Dashboard page. On this page, MO can view the modules published by Themselves and click **application status** button to enter the corresponding page to view the details. Meanwhile, MO could use + button to post new jobs. Here's an example of Dr. Yahooo's module page.

7.Module details page



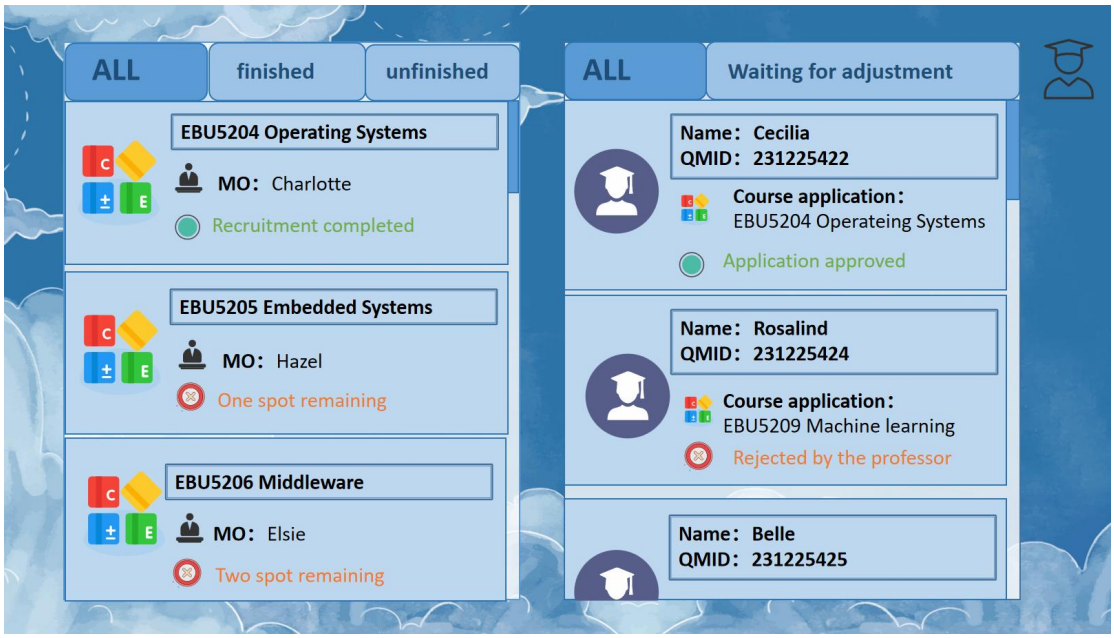
On this page, MO can view the registration of teaching assistants in each module, see the name, and click CV to see the profile of the corresponding student. Mo can decide whether to accept the student as a TA through buttons **Accept** and **Not accept**. A module can have up to three teaching assistants. When the count in the upper left corner becomes "3/3", students can no longer be accepted as teaching assistants of the module. When MO wants to change the information of that module, they can click **Edit** to change it. At last, MO can click **x** to close this job.

8.New module publishing page



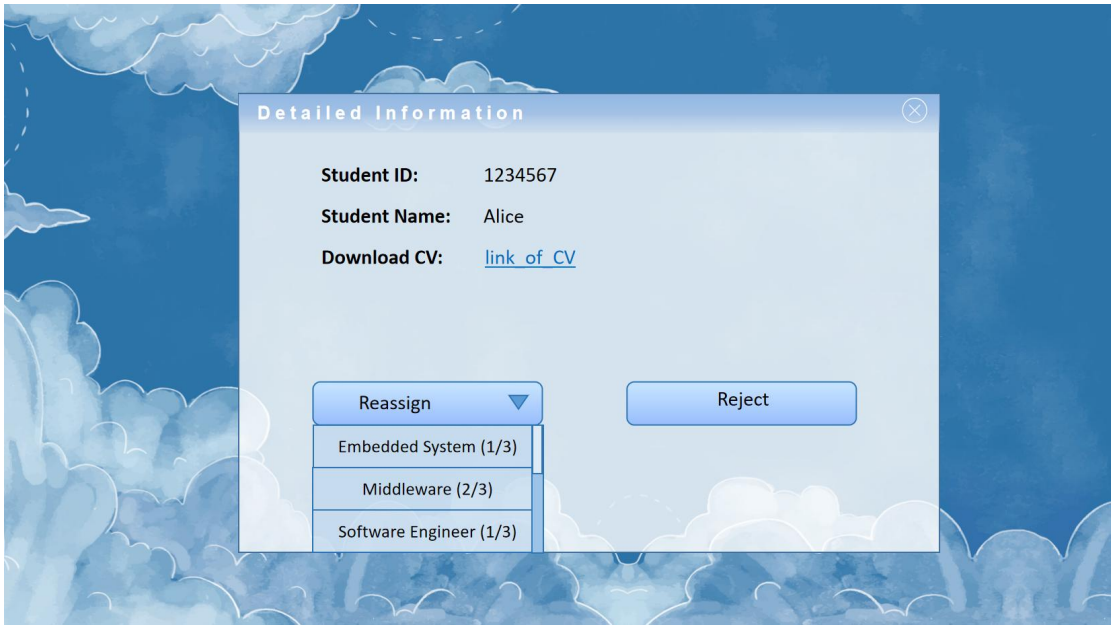
After clicking + in the module dashboard page, MO will turn to this page. MO need to clearly fill the blanks of : Module name, Module Number, Module Description, Workload, Requirements and Number of people required. After completion, MO can click **Publish** to release new job. As the picture is an example of module Software Engineering ready to publish.

9.Admin Dashboard page



On the admin side, the left section is a course recruitment dashboard with top tabs to filter courses by All/Finished/Unfinished, showing MO details and recruitment status. The right section is a TA application dashboard with tabs to filter all or adjustment-waiting applicants; clicking a rejected TA's card navigates to the reassign page.

10.Admin Reassign page



When the administrator clicks on each TA's profile picture, this interface pops up. It displays the student's ID, name, and a CV download link. At the bottom of the interface, there are two buttons: on the left is the **Reassign** button, which is a dropdown button. The dropdown list shows courses that still have available positions. On the right is the **Reject** button; clicking it allows the administrator to reject the student's application for the TA position.
